

HF8

Document Trim size should be 5.7326" W x 8.0139" H

Document Bleed should be 0.125" beyond trim

Delete "Production Notes" layer prior to sending art

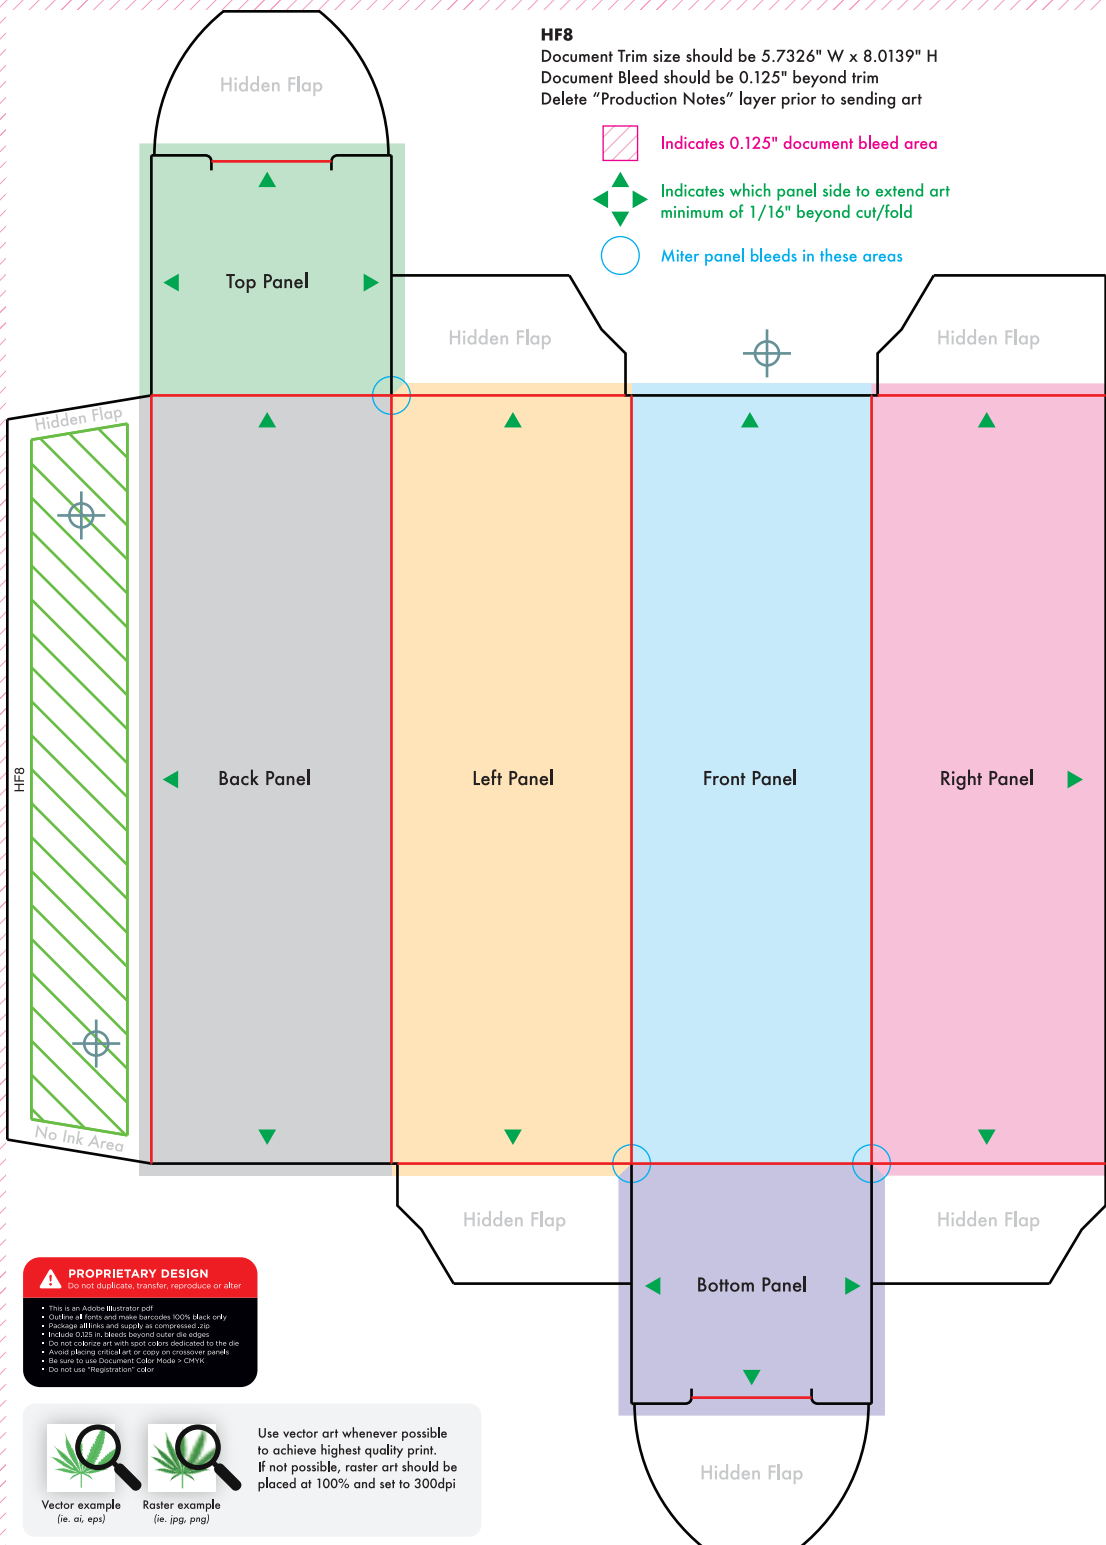

Indicates 0.125" document bleed area

Indicates which panel side to extend art minimum of 1/16" beyond cut/fold

Miter panel bleeds in these areas

PROPRIETARY DESIGN

- Do not duplicate, transfer, reproduce or alter
- This is an Adobe Illustrator pdf
- Outline all fonts and make sure fonts 100% black only
- Package all links and supply as compressed .zip
- Include CMYK to bleeds beyond miter die edges
- Do not colorize art with spot colors dedicated to the die
- Avoid placing critical art on top of miter/bleed panels
- Be sure to use Document Color Mode > CMYK
- Do not use "Registration" color

Vector example (ie. ai, eps) Raster example (ie. jpg, png)

Use vector art whenever possible to achieve highest quality print. If not possible, raster art should be placed at 100% and set to 300dpi
